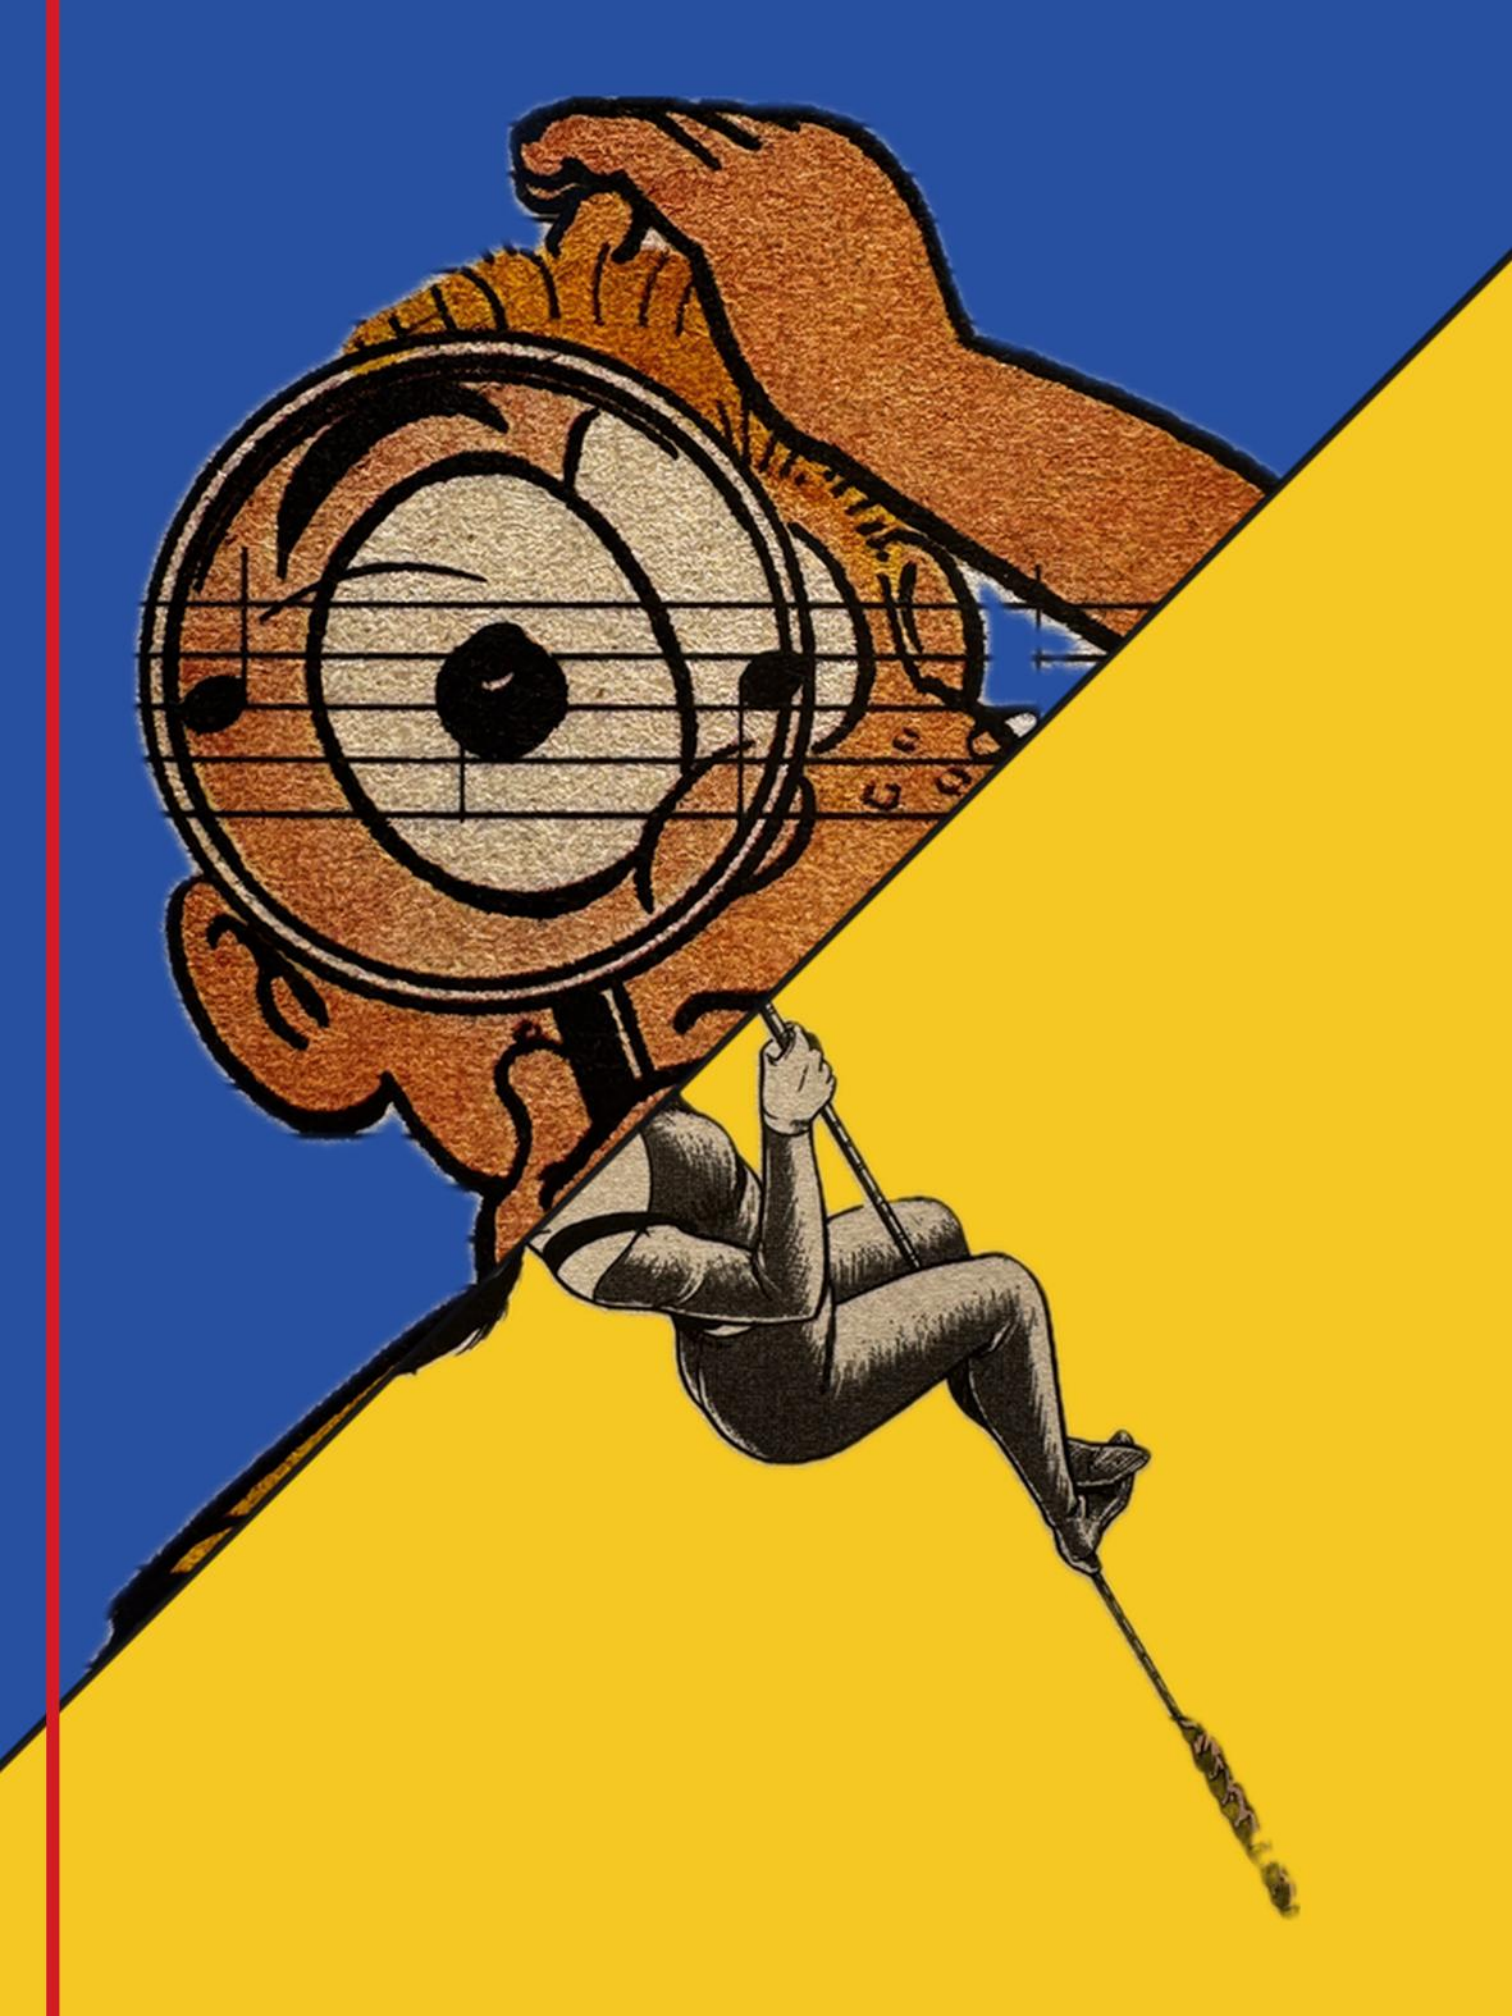

Fig. 104. Synchro Compur II: 1. Flash terminal, 2. Shutter cocking lever, 3. Delayed action knob, 4. Setting ring and window for shutter speed, 5. Press focusing button, 6. Synchroselection selector, 7. Release cable socket, 8. Release lever, 9. Diaphragm setting lever.

Shutters

All lenses supplied for LOMO cameras are mounted between-lens shutters. Shutters are instruments of the highest precision and call for appropriate treatment and care in handling. It is extremely important to understand clearly the functions of
